City of Hope, Helford Clinical Hospital
Duarte, California

Seven-story, 340,000 sf replacement hospital facility contains 144 patient beds, radiology, MRI suite, operating suites with recovery rooms, and lab support services, along with pharmaceutical, respiratory and cardiology support services. The new hospital is connected to the existing outpatient services via two pedestrian bridges.

Ronald Reagan UCLA Medical Center
Los Angeles, California

This 1,200,000 sf acute care replacement hospital was designed to provide high-acuity and intensive care for 525 patients and observation services for 65 patients. The project consisted of eight stories above-grade and two below, one of which provides parking for about 300 vehicles.

Montfort Jones Memorial Hospital
Kosciusko, Mississippi

The project included a 64,282 sf new bed tower and 61,542 sf of renovations. The building is a two-story, concrete structure with brick exterior and EIFS canopy, and storefront windows with curtain wall at entrance. Finishes included resilient flooring in patient areas and porcelain tile in public areas. The renovation required five phases of work in order to move the hospital staff from one area to the next, all while keeping the hospital operational. Life safety, removing and replacing old systems such as fire alarm, medical gas, steam and sprinkler, and infectious control were major challenges of the project.

Stanford Cancer Center
Stanford, California

Four-level, 224,836 sf cancer center including clinics, diagnostic services, learning centers, treatment units, ambulatory treatment, outpatient surgery and a basement that houses seven linear accelerators, PET-CT scanner, CT SIM, CE scanner, HDR brachytherapy, radiology suite, mammography, apprehensive infusion center, as well as associated exam rooms, offices and other support spaces.

Children’s Harbor Research & Innovation Center
Birmingham, Alabama

This building houses Children’s Health System's teaching, research and outreach programs. The complex design mimics the bow of a ship with walls radiused and offset in three planes to form the “bow” of the ship. The 105,000 sf museum-quality building includes a lecture hall and meeting rooms, a 9,200 sf vivarium, 21,000 sf of wet labs and 21,000 sf of research labs.

Kaiser Vacaville Medical Office Building
Vacaville, California

Four-story, 220,000 sf medical office building and ambulatory service center. The exterior is composed of metal panels and lath-plaster skin with curtain wall and punched window type glazing system, and single-ply type roofing membrane.
Healthcare Experience

Dana-Farber Cancer Institute, Smith Laboratories
Boston, Massachusetts

The facility has 13 floors above-grade and seven floors below-grade for parking. Two bridges connect the new facility to adjacent Dana-Farber buildings at intermediate levels. The building houses biomedical research laboratories and support space to advance Dana-Farber’s world-renowned research to identify the causes and cures of cancer.

South Shore Hospital Obstetrics Center and Surgical Suite
South Weymouth, Massachusetts

Four-level, 124,000 sf addition includes family-centered maternity unit featuring all private rooms and expanded special care nursery. An expanded emergency department includes specialized units for pediatric, cardiovascular and trauma patients. Fourteen new operating rooms are designed for complex procedures.

Kaiser Los Angeles Medical Center Rebuild
Los Angeles, California

This 1,000,000 sf facility consisted of the phased demolition and reconstruction of the medical center. The project included 460 new beds with complete operating rooms, emergency department, radiology, OB/GYN and cafeteria facilities supported by a new central plant service building.

Wilson N. Jones Medical Center Ambulatory Care Facility and Parking Garage
Sherman, Texas

This two-part design-build project is located approximately 60 miles from downtown Dallas. The five-story, 138,913 sf medical office building includes an ambulatory care unit, a radiology center, a morgue facility, a pharmacy with a drive-through, food court, and the fit-out of all physician offices. This structural steel facility has a brick, burnished block and glass façade. The five-level, 779-car parking garage was built from precast concrete and completed in nine months.

Cypress Medical Network, Ryan Ranch Outpatient Campus
Monterey, California

Two-story, 90,000 sf medical office building and two-story ancillary radiology building.

San Joaquin County Hospital Replacement Facility
Stockton, California

The three-story, 269,000 sf hospital building consists of a surgical suite, operating rooms, labor and delivery rooms, a 16-bed intensive care nursing unit, a 25-bed progressive care unit, and 50 private and semi-private beds. The facility also includes an emergency room, radiology, pharmacology and medical records.
East Alabama Medical Center Cancer Center Phase 1  
Opelika, Alabama  
This 8,000 sf addition to East Alabama Medical Center’s existing cancer center facility included a linear accelerator vault to house a state-of-the-art linear accelerator machine. The rest of the addition included new exam rooms, a learning library and conference room.

Kaiser Santa Clara Replacement Facility Phase II  
Santa Clara, California  
Phase II includes a cafeteria, mobile imaging dock, MRI suites, catheter laboratories, EP laboratories and two main four-story patient bed towers.

New South Neuro Spine Building  
Jackson, Mississippi  
The South Neuro Spine Building is an 82,000 sf steel structure, GFRC and glass exterior. The tenant improvement work included medical offices, physical therapy areas, auditorium capable of seating up to 150 people and site development.

Regional Medical Center  
Anniston, Alabama  
The 99,000 sf Women’s and Children’s Clinic addition to the main hospital includes 88 beds, 10 birthing rooms and a level II nursery. Various renovations include the radiation oncology department, various nursing units, a surgery addition, PACU renovation, replacement of all emergency power generation for the entire hospital and a new central plant.

G. Dodd Brister, Orthodontics Office  
Pearl, Mississippi  
The 4,800 sf orthodontics office is a Louisiana/Acadian-style building offering a warm and inviting home-like entrance featuring cypress timbers, cypress rafters and cypress timber outriggers supporting a standing seam metal roof. The craftsman-style wooden and glass front doors are capped with a cypress lintel. Wooden windows, two per side, stand the same height as the front doors and are also capped with cypress lintels and highlighted by Spanish Cedar shutters. Massing of the building is broken up to mimic two façades and keep the building size to a human scale.

Louisiana Cancer Research Center  
New Orleans, Louisiana  
The Louisiana Cancer Research Center (LCRC) is a 10-story, 260,000 sf highly advanced research building. The design incorporates a four-story concrete frame parking garage with a structurally isolated six-story steel frame research building above. Three floors will be dedicated to cancer research laboratories for LCRC’s Immunology, Molecular Signaling and Molecular Genetics research programs. The top floor will house a vivarium and executive offices. A large theatre-style meeting facility will be located on the first floor. The remaining two floors will be flexible “white box” spaces for future growth as laboratories, offices or clinical services.
Catholic Healthcare West, Bakersfield Memorial Hospital
Bakersfield, California

Four-story, 70,000 sf addition to the existing one-story Baker Memorial Hospital labor and delivery building consisting of medical/surgery and ICU patient rooms, and 114 total new beds.

Memorial Hospital at Gulfport Medical Office Building and Parking Garage
Gulfport, Mississippi

Four-story, 95,500 sf medical office building with an atrium and food court shell and a four-story, post-tension concrete parking deck. The building contains numerous doctor’s offices adjacent to the four-story atrium. A food court shell connects the Medical Office Building with Memorial Hospital at Gulfport. The 121,600 sf parking garage holds 285 vehicles.

Kaiser San Leandro Hospital
San Leandro, California

The 848,000 sf replacement hospital for the Hayward Medical Center includes a 263-bed, 438,000 sf hospital, as well as a 410,000 sf support building and central utility plant.

University of Mississippi Medical Center, School of Health Related Professions
Jackson, Mississippi

The School of Health Related Professions (SHRP) offers baccalaureate programs in clinical laboratory sciences, cytotechnology, dental hygiene, health sciences, health informatics and information management, and radiologic sciences. SHRP also offers a master of occupational therapy and a doctor of physical therapy. This new construction building is structural steel with a glass curtain wall, masonry and cast concrete.

Veterans Administration Medical Center
Detroit, Michigan

The 1,000,000 sf state-of-the-art replacement facility includes 503 beds for medical, surgical, psychiatric, intermediate medicine and dialysis treatment stations. The new center has three main elements: the diagnostic/treatment block, psychiatric tower, and medical/surgical tower.

Pacific Medical Buildings, Pomerado Hospital Outpatient Services Pavilion
Poway, California

Five-level, 170,000 sf shell and core medical office building including two floors of hospital support function with imaging, radiology, women programs, etc., and three floors of doctors offices and outpatient clinic functions.

John Muir Health Medical Center Concord Campus
Concord, California

New 170,000 sf, five-story facility including one-level basement patient tower tied into existing central utility plant and hospital.
Healthcare Experience

Kaiser Roseville Women’s & Children’s Center
Roseville, California

The facility is a four-story, 190,000 sf addition with pre-natal, birthing and post-natal services, and other non-patient care related services and dedicated pediatric intensive care unit. The center is connected to the existing hospital facility with a 450-ft-long pedestrian bridge.

Kaiser Roseville Emergency Department Expansion
Roseville, California

Five new emergency room suites including treatment rooms, nurse stations, waiting rooms and offices. Radiology addition includes three radiology labs, provider offices, holding and recovery rooms, nurse stations and other ancillary services.

USC University Hospital, Harlyne Norris Acute Care Tower Addition
Los Angeles, California

This nine-story addition is attached to the main hospital facility and has a new basement and penthouse central plant, intensive care suites with a total of 44 beds and a 134-bed medical-surgery unit. Additional features include 11 operating rooms, medical oncology inpatient care, a satellite pharmacy, and a sterile processing department.

UCLA Santa Monica Orthopaedic Replacement Hospital
Santa Monica, California

The Santa Monica Orthopaedic Replacement Hospital is a state-of-the-art medical center and orthopaedic hospital. The facility includes four new hospital wings consisting of 332,305 sf of new construction, as well as 277,587 sf of renovation to the existing medical center and hospital. The southwest wing features an emergency center, birthing center, neonatal intensive care unit, isolation patient rooms, an oncology unit and clinical laboratories. The remaining portions of the project include operating rooms, radiology rooms, MRI, CT scan rooms and a complete array of highly specialized services.

Cedar Lake Medical Office Building
Biloxi, Mississippi

The Cedar Lake Medical Park is a 78,000 sf, three-story Physicians Center. This building houses 14 separate physician suites including a radiology suite, cardiac rehabilitation suite, sports physical therapy facility, and an urgent care clinic. The building exterior is a complement of masonry, EIFS, and high-performance glass. The main entrance, a three-story atrium lobby, includes an optical retail store, marble-lined fountain, and glass railings with integral planters to welcome patients.

Kaiser Vacaville Medical Center Hospital
Vacaville, California

Four-story, 340,000 sf, 150-bed hospital plus basement includes emergency department, ICU and operating rooms, kitchen, dining room and gymnasium.
Veterans Administration Mental Health Facility  
Biloxi, Mississippi

This 98,000-gross sf project consists of a two-story, 64-bed mental health facility for inpatient and outpatient care. Work includes site utilities, earthwork and site lighting, as well as access roads and parking. This project is located in the middle of an existing active hospital campus, so the utility portion of this project provides for the existing campus, as well as new buildings. It also replaces the existing sanitary sewer system with a new system and lift station. The finishes are detailed woodwork complete with painted gypsum board walls, carpeting, wood grain sheet vinyl flooring and stained wainscot and chair rail.

Kaiser Roseville Medical Office Building II  
Roseville, California

The 258,000 sf project includes entire phone cabling and telecommunications for new medical office building.

Memorial Hospital at Gulfport  
Gulfport, Mississippi

Multi-phased work has included renovations to the radiology department, a physical plant addition, parking garage repairs, as well as renovations and repairs following Hurricane Katrina. Larger projects included a 160,000 sf, five-story Clinical Support Tower which was constructed adjacent to an existing two-story superstructure. A new emergency medicine department and ambulatory surgery facility were also added. Renovations to the East Tower included asbestos and lead paint abatement, and demolition of the existing first and second floors, which were subsequently converted to a wound care facility, office space and a rehabilitation center.

Southern Ocean County Hospital  
Manahawkin, New Jersey

Expansion program consisted of new construction providing 102 adult medical/surgical beds, and the renovation for outpatient, ancillary and support departments including new outpatient radiology area, emergency with trauma, cardiac and pediatric care, and pre-admissions testing facility for same-day surgery.

Children’s Hospital Los Angeles, New Patient Tower and Parking Structure  
Los Angeles, California

Seven-story, 603,000 sf inpatient tower with 317 beds. The project includes a three-level below-grade parking structure with 201 spaces and a central plant expansion.

Kaiser Santa Clara Medical Office Building  
Santa Clara, California

Four-story medical office building including 426 exam rooms, 281 provider offices, physicians library, operating rooms, pharmacies, conference area for classes and seminars, cafeteria and fitness center. A 50-acre development was included involving grading, utilities, paving and landscaping.
Healthcare Experience

Sutter Health, Solano Campus Cancer Center and Medical Office Building
Vallejo, California

Three-story steel frame/concrete filled metal deck cancer treatment center and medical office building to include extensive sitework on sloped site.

Pacific Medical Buildings, Huntington Memorial Outpatient Services Pavilion
Pasadena, California

New four-story, 194,000 sf medical office building and a 6½-story parking garage.

Ochsner Critical Services Expansion
New Orleans, Louisiana

This 140,000 sf expansion includes a new emergency room and hospital main entrance, 10 new surgical suites, 32 new ICU rooms and associated nurses’ stations, new mechanical room, and an elevator tower that rises through four floors upward to the 11th floor of the existing hospital.

Highland Community Hospital
Picayune, Mississippi

New 117,000 sf hospital with an attached 38,000 sf medical office building. The three-story hospital portion is fully functioning to include operating rooms, emergency department, radiation department, and MRI and imaging department. The hospital also include 50 patient rooms, ICU, and a labor/delivery department in addition to office space and a food service area. The two-story medical office building connects to the hospital and includes office support space and a physical therapy/occupational therapy suite along with shell space for future expansion.

Cornell University Veterinary Hospital
Ithaca, New York

The 337,000 sf complex includes hospital space, specialty and biological research laboratories, and academic and support areas. A 120,000 sf animal hospital, featuring adjacent barns, includes treatment and operating rooms, intensive care, x-ray and radiation therapy for large and small animals.

Kaiser South San Francisco Cancer Center
South San Francisco, California

Cancer center with 12 examination rooms, linear accelerators, a CT scanner, physician offices, and space for support staff. The center treats 1,000 cancer patient annually.

St. Dominic Hospital Behavioral Health Services Facility
Jackson, Mississippi

The new 77-bed facility replaced an existing building that needed substantial repairs. The new 1½-story building will be built in two phases with 56,500 sf on the ground level and 28,500 sf on the top floor.
St. Christopher’s Hospital for Children (Part of Tenet Health Care Systems)
Philadelphia, Pennsylvania

This state-of-the-art children’s hospital includes 310,000 sf of program space and 183 beds. Occupying the facility are operating suites, transplantation suites, ambulatory care pavilion, burn center, emergency department, nuclear medicine and radiology, research facilities, as well as nursing, administration and general support.

Children’s Hospital Emergency and Operating Room Addition and Renovation
New Orleans, Louisiana

Five-floor, 60,000 sf addition to the existing emergency room, two cardio-surgery suites, two floors of mechanical and electrical systems above the existing central plant, and renovations to the PICU/CICI units.

Kaiser San Marcos Outpatient Medical Center Phase II
San Marcos, California

New construction of a 130,460 sf two-story outpatient medical center.

Community Medical Center (Part of Saint Barnabas Health Care System)
Toms River, New Jersey

The new five-story, 115,000 sf medical-surgical patient tower addition added 95 new beds to the existing 370-bed hospital. A new 250-car, three-story precast concrete parking garage provides secure parking access for patients, employees and visitors.

Kaiser Santa Clara Replacement Facility Phase I
Santa Clara, California

This 297,058 sf hospital consists of general, ortho, cardio-vascular, ambulatory operating rooms, 32-bed emergency department, 14-bed clinical decision unit, and a central utility plant.

South Shore Hospital Emergency Center and Obstetric Unit
South Weymouth, Massachusetts

The new three-story wing for emergency and obstetrical services is designed as a step-down to the existing facility. The center includes new treatment areas, trauma room and radiology room. The obstetric unit features special care nursery and well-baby nursery.

Child Health Institute of New Jersey
New Brunswick, New Jersey

The 156,000 sf clinical research and development facility includes laboratories, offices and administrative space, a transgenic gene targeting facility, and 54,000 sf of research space comprised of a 20,000 sf vivarium and 34,000 sf of clinical research space.
Biloxi Regional Medical Center Medical Office Building and Parking Garage
Biloxi, Mississippi

This 55,716 sf project is a three-story, steel frame medical office building with a brick veneer and aluminum curtain wall exterior, and one-inch silicone glazed insulating glass. Located in the building are an oncology suite, physical therapy and x-ray/laboratory suite on the first floor. The remaining floors were completed as individual physician office suites. The five-level, 157,009 sf precast parking garage has 430 spaces with two elevators and stairwells.

Cooper University Hospital Medical Center
Camden, New Jersey

New 160,000 sf medical office building and 1,000-car parking garage. The parking facility is linked to the medical office building via an all-weather connecting bridge and is serviced by two elevator banks. Advanced, around-the-clock security provision includes a manned gatehouse, electronic surveillance, and 24-hour on-site manned security.

Doylestown Hospital
Doylestown, Pennsylvania

Three-story, 167,000 sf ambulatory care facility, interior renovations program and exterior brick replacement. Renovated areas include the coronary care unit, surgery and recovery, ECG-EEG, occupational therapy, speech therapy, social services, gift shop, main lobby, admissions and medical records.

About Tutor Perini Corporation

Tutor Perini Corporation is a leading building and civil construction company offering diversified general contracting and design-build services to private clients and public agencies. The Company has provided construction services since 1894 and has established a strong reputation within our markets by executing large complex projects on time and within budget while adhering to strict quality control measures.

Tutor Perini Corporation offers general contracting, preconstruction planning and comprehensive project management services, including the planning and scheduling of the manpower, equipment, materials and subcontractors required for a project. We also offer self-performed construction services including excavation, concrete forming and placement, steel erection, electrical and mechanical services, plumbing and HVAC.

Core competencies and resources enable the Tutor Perini Building Group to meet the needs of specialized niche markets. Our building operations focus on large, complex projects with aggressive schedules in the sports, hospitality and gaming, transportation, healthcare, education, corrections and government markets.

Capitalizing on core strengths, Tutor Perini provides the individual building companies enhanced opportunities for growth through increased size, scale and management capabilities; immediate access to multiple geographic regions; and increased bonding capacity.
